EDUCATION

Sibsagar Commerce College (Dibrugarh University)

Aug. 2023 – July 2026

Bachelor of Computer Applications

Sivasagar, Assam

- **Relevant Coursework:** Data Structures and Algorithms, Computer Graphics, Operating System, Database Management Systems, Software Engineering, Internet and Web Programming technologies.

TECHNICAL SKILLS

Languages: JavaScript, HTML/CSS, SQL

Frameworks/Libraries: React.js, Node.js, Express.js, GSAP

Databases: MySQL, MongoDB

Developer Tools: VS Code, Git, GitHub, Vercel, Postman

PROJECTS

BookMart | *React.js, Node.js, Express.js, MongoDB, Tailwind CSS*

Feb. 2026

- Developed a full-stack e-commerce marketplace to streamline book discovering and selling, featuring dedicated portals for both readers and sellers.
- Implemented a robust backend architecture using Node.js and Express to handle role-based user authentication, shopping cart/wishlist management, and complex order processing logic.
- Designed and integrated a MongoDB database for scalable and efficient data storage of comprehensive book catalogs, user profiles, and order histories.

HyperLSP | *React.js, Node.js, Express.js, MongoDB, Tailwind CSS*

Jan. 2026

- Developed a full-stack Local Service Provider (LSP) platform featuring distinct portals for users and providers, styled intuitively with Tailwind CSS.
- Implemented a secure backend architecture with Node.js, Express, and JWT to enable role-based access, real-time booking management, and provider analytics.
- Engineered a scalable MongoDB database schema to efficiently manage and relate data across users, providers, service catalogs, and transactions.

SweetBite | *React.js, Node.js, Express.js, MySQL, Tailwind CSS*

Nov. 2025

- Developed a full-stack e-commerce bakery management system to digitalize daily operations and establish an intuitive online storefront.
- Implemented a customer-facing platform allowing users to seamlessly browse bakery products, place orders, and track their order history.
- Built a secure administrative dashboard to efficiently manage product catalogs, process incoming orders, and monitor real-time inventory levels.

Personal Portfolio Website | *React.js, GSAP*

Dec. 2025

- Designed and deployed a responsive, single-page developer portfolio to showcase software projects and technical skills.
- Integrated GSAP (GreenSock Animation Platform) to engineer highly optimized, smooth scrolling animations and interactive UI elements.

EXTRACURRICULAR & TECHNICAL ACTIVITIES

Hackathon Competitor & Developer

Nov. 2025

Team Collaboration & Rapid Prototyping

- Competed in a high-pressure hackathon environment, rapidly prototyping and deploying an AI-driven computer vision application.
- Collaborated on system architecture and pitched the final Animal Detect project functionality to judges.
